SciCan’s new line of height adjustable Endo Pre-Cleaning Sinks provides a concrete response to the challenges posed by the reprocessing of flexible endoscopes. The integrated smart program guides users through the pre-cleaning stages, promoting compliance with all applicable standards and specific manufacturers’ instructions, while its automated features greatly improve the speed, convenience and reliability of endoscope reprocessing. Made from T304 stainless steel, SciCan’s Endo Sinks are recognized for their excellent design and exceptional quality.

- **Ergonomic**
  - Height-adjustable station providing comfort to the users

- **Customizable**
  - Single, double or triple bowl, extended working counters, air/water pistols, built-in ultrasonic cleaners

- **Easy to use**
  - Smart program to guide users through the pre-cleaning stages. Interactive touchscreen display

- **Automated Pre-Cleaning**
  - Integrated features include leak testing, automatic bowl filling, chemical dosing and injection, automated channel flushing and purging

- **Safe and Compliant**
  - Full pre-cleaning process traceability
  - Promote compliance with reprocessing standards

- **Time Saving**
  - Automated features dramatically improve the speed of endoscope reprocessing
Fit the needs of your facility with tailored solutions.
